

IRN THE RECYCLING NETWORK

“OneStop” Recycling for Multiple Materials

IRN’s services have always evolved and expanded in response to client needs. We don’t recycle six dozen materials because we want to, but because our members and clients have told us they need to be recycled.

Along the way, we’ve heard one story over and over again: “We don’t generate a lot, but we generate a lot of different materials. We don’t have time to handle them, and we have nowhere to store them.” These organizations want to recycle aggressively, but they don’t have enough to reach “marketable” quantities, and they don’t have the time to manage of a bunch of small-quantity recycling programs.

Recycling gets to be annoying, complicated, and expensive. A lot of the time, recyclables are ultimately just thrown away.

IRN’s solution is simple: **Pick up and recycle several different materials at the same time, on the same truck.** This is IRN’s OneStop program.

IRN was a pioneer of “milk run” pickup for more than one commodity. We’ve been doing joint collection of electronics and universal wastes since 2000. But we’ve expanded the milk run to pick up almost everything else at the same time: paper, cardboard, confidential documents, surplus property, appliances, pallets, and more. We break down these mixed truckloads, sort them, and send them on to the appropriate markets. With OneStop, whatever you set out, we can take away.

OneStop - Really simple but really comprehensive, for one or two or a half dozen different materials.

We’ve gone another step to make recycling even simpler, with a pre-paid program that’s unique to the IRN. For the most common commodities - paper, cardboard, and beverage containers – we provide tinted heavy-duty recycling bags for each material. You pay for the recycling bag up front, then stuff it as full as you can, and we take it away. It’s that simple. We also provide the recycling containers that you can use to set up recycling bags throughout your facility, with different colors and different slotted tops for each material.

For other items like computers, monitors, fluorescent lamps, batteries, pallets, and surplus furniture, we provide a simple weight- or volume-based program, with a commodity-specific accounting for whatever you put on the truck. You’ll see a single reconciliation for all of these commodities, a single invoice, and detailed reporting for every material.

We can dispatch the One-Stop truck on a regular schedule, or we can put you on call, so that you get the truck only when you have a critical mass to recycle. If you want, we can come into your facility and pick up materials where you tell us. Or we can pick up from multiple locations. It’s your decision, whatever works best for you.

With this system, One-Stop reaches throughout your organization to provide a really simple but really comprehensive recycling program for one or two or a half dozen different materials.

If One-Stop could work for you, give us a call (866-229-1962) or email at info@ir-network.com. We can put you in touch with members for whom One-Stop recycling has made a big difference, or schedule a visit to get you started.

OneStop for

Mixed Paper	White Paper
Cardboard	Confidential Docs
Electronics	Universal Wastes
Surplus Property	Appliances
Plastic	Beverage Containers
Metal	Pallets

And More . . .
